## Cytosol

I get to go with the flow every day! I'm a fluid that hangs out between the nucleus and cell membrane.

## Cell Wall

I only provide support and protection for plant cells.

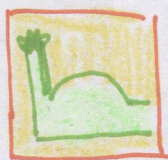

## Cytosol

What's up, Vacuole?

You know I like hanging out with you, but maybe next time you could cut down on the enzymes and wastes. Dude, if you eat too many you'll explode and I'll be smashed again at your place. If you keep this up.

7 minutes ago

## Cell Wall

Hey Vacuole! We have to chill sometime soon. I want you to see my guns. Helping support and protect plant cells keeps me buff.

## Plastid

Peace out home boy. I'm coming over later to show you both of my membranes. You're going to be jealous.
